

Session 4 – Upgrade of Glengowrie Depot

Rod Atkins, BTM – how much was spent on the upgrade?

About \$12.7million (Stage 1)

Mal Rowe, TMSV – delighted to see the work on the H Type being undertaken. How will these trams and the necessary skills be maintained in the future?

Response - One of the reasons for new apprentices being taken on, bring in fresh blood and also updating the necessary documentation.

Brent Efford, WTM – a future depot and the use of the spray booth?

Response – can fit maybe another 3 to 4 trams on existing site, perhaps future expansion on Jockey Club land to the east. The spray booth used for local repairs, mainly resulting from mishaps on Jetty Road. Not a lot of spray equipment provided. Would use an external contractor as required.
